1-9. (Previously Cancelled).

10. (Currently Amended) A method for programmatic generation of continuous multimedia presentations by a station capable of receiving at least one presentation and a plurality of sensed events, the method comprising the steps of:

maintaining a library of rules;

receiving at least one presentation;

selecting at least one event [to be sensed] wherein events control which rules in said library are applied to said presentation;

[receiving the at least one event;]

testing each rule in the library for each [received] selected event; and

applying each rule that positively responded to the testing step to the at least one presentation to modify the at least one presentation.

11. (Previously Cancelled).

12-40. (Previously Cancelled).

41. (Previously Added) A method of modifying previously-generated presentation documents, said method comprising:

YO998137
09/070,831

creating a set of rules based on user input;
selecting a previously-generated presentation document to be modified;
automatically modifying, without user intervention, said previously-generated presentation document based on said rules to produce a modified presentation document; and
outputting said modified presentation document.

42. (Previously Added) The method in claim 41, wherein said modifying comprises changing content of said previously-generated presentation document.
43. (Previously Added) The method in claim 41, wherein said modifying comprises changing temporal order of sections of said previously-generated presentation document.
44. (Previously Added) The method in claim 41, wherein said modifying comprises changing spatial layout of said previously-generated presentation document.
45. (Previously Added) The method in claim 41, wherein said modifying comprises changing presentation attributes of said previously-generated presentation document.
46. (Previously Added) The method in claim 41, wherein said previously-generated presentation document comprises continuous media components.

47. (Previously Added) The method in claim 41, wherein said previously-generated presentation document comprises audio and video components.
48. (Previously Added) The method in claim 41, wherein said previously-generated presentation document comprises static components.
49. (Previously Added) A method of modifying previously-generated presentation documents, said method comprising:
- creating a set of rules based on user input;
 - selecting a previously-generated presentation document to be modified;
 - automatically expanding, without user intervention, said previously-generated presentation document based on said rules to produce an expanded presentation document; and
 - outputting said modified presentation document.
50. (Previously Added) The method in claim 49, wherein said expanding comprises expanding portions of said previously-generated presentation document.
51. (Previously Added) The method in claim 49, wherein said expanding comprises adding new data to selected portions of said previously-generated presentation document.

52. (Previously Added) The method in claim 49, wherein said previously-generated presentation document comprises continuous media components.
53. (Previously Added) The method in claim 49, wherein said previously-generated presentation document comprises audio and video components.
54. (Previously Added) The method in claim 49, wherein said previously-generated presentation document comprises static components.
55. (Previously Added) A method of creating a composite presentation sequence from at least two previously-generated presentation documents, said method comprising:
- creating a set of rules based on user input;
 - selecting at least two previously-generated presentation documents to be combined;
 - automatically combining, without user intervention, said previously-generated presentation documents based on said rules to produce said composite presentation document;
 - and
 - outputting said composite presentation document.
56. (Previously Added) The method in claim 55, wherein said combining process simultaneously presents said at least two previously-generated presentation documents.

57. (Previously Added) The method in claim 55, wherein said combining process interleaves said at least two previously-generated presentation documents.
58. (Previously Added) The method in claim 55, wherein said previously-generated presentation documents include static objects and said combining process simultaneously displays static objects from different presentation documents.
59. (Previously Added) The method in claim 55, wherein said previously-generated presentation documents comprise continuous media components.
60. (Previously Added) The method in claim 55, wherein said previously-generated presentation documents comprise audio and video components.
61. (Previously Added) The method in claim 55, wherein said previously-generated presentation documents comprise static components.
